

Manufacturer of technically advanced
flashlights and watertight
protector cases

Large Cases

#0340 CUBE CASE

The 0340 is the third Cube Case developed by Peli™. This new spacious case has been developed with the same material, copolymer polypropylene, as the rest of Peli™ cases. It is also watertight, indestructible and corrosion proof. The heavy duty removable casters included make it easy to roll. It can also be transported by two extra wide handles on each side. It includes a recessed, built-in, rigid pull handle, secured by a spring loaded release latch that will stay folded down when not needed. This Cube Case has the new metal reinforced padlock protectors. It is available with optional foam or padded, dual-level dividers for total protection of the equipment inside, and a practical multi-pocketed lid organiser. Now with the new Cube Cases you will be able to protect your square equipment (PC monitors, Televisions, square instrumentation, etc.) and totally surround them with protection.

Unconditionally Guaranteed ... forever.
