

Manufacturer of technically advanced
flashlights and watertight
protector cases

Large Cases

#0350 Cube Case

The first Cube Case developed by Peli™ is called 0350. This new spacious case has been developed with the same material, copolymer polypropylene, as the rest of Peli™ cases although this is the first square case of the range. It is also watertight, undestructible and corrosion proof and it can be used with foam or padded dividers for total protection of the equipments inside. Optional heavy duty removeable casters make it easy to roll. It can also be transported by two big handles on each side. Now with the new Cube Cases you will be able to protect your square equipment (PC monitors, Televisions, square instrumentation, etc.) and totally surrounded with protection. Unconditionally guaranteed.
