

Design Services

CP Cases UK-based design team can create a solution to any application that you or your product require

OEM Product Protection

CP offers a complete design service for OEM product protection.

We have experience operating in the Medical, Defence, Media, Electronics, Offshore and Telecommunications industries.

Our strength is providing innovative, cost effective protection for delicate and expensive equipment in multi-trip operational use.

We work with you through the design and manufacture process of:

- Finalising the brief and developing design concepts
- Selecting the optimum solution and constructing a model
- Resolving design issues and preparing final drawings
- Defining manufacturer, quality and logistics methods

Our designers are equipped with Mac and PC hardware, coupled with powerful software including SolidWorks, AutoCAD, InDesign, Illustrator and Photoshop.

They have extensive experience in diverse manufacturing processes including rotomoulding, blow moulding and injection moulding, vacuum forming, precision sheet metalwork and traditional craft skills in a wide range of materials.
