

Manufacturer of technically advanced
flashlights and watertight
protector cases

Large Cases

#0370 CUBE CASE

The 0370 is the second Cube Case developed by Peli™. This new spacious case has been developed with the same material, copolymer polypropylene, as the rest of Peli™ cases. It is also watertight, indestructible and corrosion proof and it can be used with foam or padded dividers for total protection of the equipments inside. Optional heavy duty removable casters (two fixed and two rotatory) make it easy to roll. It can also be transported by two big handles on each side. The nylon strap, mounting plates and a nylon bag are included on the mobility kit. This Cube Case has the new metal reinforced padlock protectors. Now with the new Cube Cases you will be able to protect your square equipment (PC monitors, Televisions, square instrumentation, etc.) and totally surround them with protection.

Unconditionally guaranteed.
