

## The Grand Opera Conductor's Stand

This stand is designed for semi-permanent installation in the orchestra pit of large opera houses.

- The tray width is adjustable.
- The lights are adjustable for height, reach and angle.
- The very slim LEDlights give the musicians an uninterrupted view of the conductor.
- The extra lights at the sides of the tray give even and very bright illumination of the score. Light reflected off the white tray also helps to illuminate the maestro.
- Electric height adjustment puts control at the maestro's fingertips. A digital display shows the current height, and up to 6 heights can be stored in memory.
- In-built digital clock.
- Articulated accessory tray for personal items.
- The base has wheels and adjustable feet to facilitate moving.
- Second shelf for storage of scores.
- Rubber lined recesses all round the main tray for pencils and batons.
