

RAT Stage3

Let your imagination run riot with our versatile staging system.

It is so easy to use that professionals and children alike can use it to design and build their own sets.

With its considered design, incredible strength and lightweight portability Stage3 can be put together, taken apart and stored more quickly than any other staging system available today.

Product code:

1m x 1m complete with speedlocks on all sides – 103Q01

2m x 1m complete with speedlocks on all sides – 103Q02

2.44m x 1.22m complete with speedlocks on all sides – 103Q04

Specification

Very Strong Corners

The aluminium frame and diecast corners give it low weight and incredible strength.

Flexible and adaptable

Unlike other staging systems you can lock Stage3 tops together in almost any position, using a key operated from above the stage. No other staging system can do this. In addition to our standard metric and imperial sizes, we can make custom sized tops according to your exact requirements.

Speedlocks

Platforms are easily locked together by turning a key which is inserted into the top of the stage. There is no more scrabbling around underneath it. Turning the key levels the platforms and pulls them together in one continuous movement. When not in use the locks retract out of harm's way.

Corner joints

Most staging systems have mitred joints at their corners, creating dangerously sharp edges. Stage 3 has die-cast corners which are strong, rounded and user friendly

Handrails

The spring latches enable handrails to be fitted in seconds to any point around the outside of the stage. Outboard handrails have integral chair stops.

Legs

Stage 3 platforms use round legs, which are rigidly locked into position by a flick of the integral quick action lever.

The legs are the same size as standard scaffold tube so if you need an odd length of leg, the material is commonly available.

Optional – Top adjustable legs can be adjusted 20mm up or down from above the stage using the same key as for the Speedlocks.

Accessories

We supply a range of high-quality accessories to ensure our Stage3 system meets the precise needs of every musician. Our accessories include Handrails, Chair Stops, Ramp and Trolley.

Facia Hanger

The facia hanger locks to any point around the periphery of a platform, and provides a number of convenient holes with which your own facia or scenery can be attached to it.

Product code: 115Q21

Ramp

Ramp connectors enable any top to be made into a ramp, which can be connected to the stage at any point.

Product code: 113Q21/22

Skirt

Skirts attach to the side of the staging system using hangers which lock into the T slot. When no skirting is required the hangers are removed so no unsightly Velcro remains.

Product code: 108Q0200/1200

Fixed Stair

Stairs with fixed numbers of treads are ideal for users who regularly set the staging at one given height. The foot of the staircase is adjustable to different stage heights within a range. Handrails are available separately.

Product code: 109Q21/29

Modular Stair

Single stair treads interlock to form a staircase of any height. The assembled staircase then clamps quickly to the edge of the platform, at any position around the periphery. Riser heights are individually adjustable so that every riser in a flight can be set equal. When dismantled, individual steps interlock for compact storage. Handrails are available separately.

Product code: 109Q21-29

Leg To Edge Clamp

The Leg To Edge Clamp locks a leg to the edge of a lower platform. It can be locked at any point around the edge of a platform, and is applied after the platforms have been arranged.

Product code: 115Q22

Leg Clamp

Leg Clamps enable stages of unequal heights to be locked together.

They should also be used to clamp legs together at their lower ends if the stage height is 1m or more.

Product code: 115Q21

Stage3 trolley

To facilitate manoeuvring and storage in tight spaces, the trolley holds up to 6 platforms in a near vertical position.

Product code: 107Q21

Castors

Just remove the legs from a platform and replace them with Castors to make a trolley which can support 14 more platforms.

Product code: 107Q12

Chair Stop

Spring latches enable chair stops to be fitted in seconds to any section around the edge of a stage.

Product code: 112Q21

Handrail

The spring latches enable Handrails to be fitted in seconds to any point around the outside of the stage.

Outboard Handrails have integral chair stops.

Maximum horizontal load 40kg.

Maximum horizontal load for standard handrail

| 400N/m | 400N/m | 320N/m |
